## LANGUAGE

### • English

*Full Professional Proficiency.*

### • Hindi

*Full Professional Proficiency.*

## SKILLS

- Algorithms and Math.
- Python programming ([My progs](#))  
([Google certified](#))
- Angular and Node js expert ([demo site](#))
- Firebase and MySQL (backend)
- Web development training  
([Certificate](#)) ([My website](#))
- Cloud Computing ([Certificate](#))

## EXPERIENCE

### Web Developer

#### Mimansatech Pvt. Ltd.

- Developed interactive web applications using **nodejs and express**.
- I have an experience of **1.5 year with backend technologies**.
- Implemented all the stages of the web application life cycle such as application **design, planning, development, debugging and testing**.
- Handled security parameters using **input sanitization, Routing, middleware, cookies, also ensured secure http requests**.
- Achieved a high performance of web pages with a **load time of less than 3 seconds** also a **SEO score of 98**.
- Actively participated in meetings with clients to determine website goals and development strategies which helped establish further successful business with clients.

## PROJECTS

### Web Scrapping: **Data scraping from sports sites** | **Node, Socket.io, Express, MongoDB, Firebase.**

Github: Backend

- Developed a REST API by scraping data from sports sites such as ESPN, Cricbuzz, etc.
- The API features a clean architecture, access control, document CRUD operations, and Socket.IO for seamless cross-platform collaboration.
- Demonstrated my commitment to industry best practices by incorporating Docker for containerization, Postman for testing, Postman Doc for API documentation, and Firebase Storage with Firebase Functions for storage and deployment.
- Total members: 5
- My role: Developer

### Punterguru: **Sports Analytics Product** | **Node, Socket.io, Express, Firebase, Angular.**

Github: Frontend, Backend

- Created a real-time sports analytics web app with a focus on clean architecture, robust user authentication, and precise access control. Implemented Socket.IO to ensure seamless collaboration across different platforms.
- Some key features like real time score update, fully responsive, different sections for detailed analytics information related to the game, data collection per game, etc.
- Total members: 10
- My role: Developer

### E- games API Development | **Node, Express, Firebase, Redis, MySQL**

Github: Backend

- Championed the creation of a cutting-edge E-games API, showcasing expertise in Node.js, Express, Firebase, Redis, and MySQL. Some example games like card games and guessing the item.
- Engineered a resilient backend system, emphasizing optimal performance and scalability. Explore the project on GitHub for an in-depth look into the intricacies of the advanced backend architecture.
- Total members: 10
- My role: Developer

## EDUCATION

**BITM Santiniketan, W.B.**

*2017 - 2021/22*

Bachelor of Technology in Computer Science —→ Score: 8.91 CGPA

## ACHIEVEMENTS

- Created to more than 60+ project on GitHub demonstrating high level of proficiency in diverse tools and technologies.
- Designed and Deployed multiple Web apps, which are live and made available for public use.
- Achieved milestones in optimizing API performance, leading to a 20% reduction in response times and enhanced overall system reliability.
